Hole's Human Anatomy & Physiology

Synopsis

Learn. Practice. Assess. Hole's Human Anatomy and Physiology was created for the introductory level student and assumes no prior science knowledge by placing emphasis on the fundamentals. This new edition updates a great A&P classic while offering greater efficiencies to the user. The format for the 14th edition focuses on Learning Outcomes and Assessments to benefit the student along with the instructor.

Book Information

Hardcover: 1024 pages

Publisher: McGraw-Hill Education; 14 edition (January 5, 2015)

Language: English

ISBN-10: 0078024293

ISBN-13: 978-0078024290

Product Dimensions: 9.3 x 1.6 x 10.8 inches

Shipping Weight: 4.8 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (69 customer reviews)

Customer Reviews

This textbook is great. I feel a little weird saying that about a textbook, but I really believe it is. For my first anatomy class our professor used a different book. I found the book hard to follow and felt that I needed some kind of previous knowledge in order to understand what it was saying sometimes. Not so with this book. I really feel like this book breaks down the complicated medical language. I really appreciate the way that it is organized as well. There are a few chapters that maybe should be reversed for a more better understanding, but no big deal. Our professor went ahead and just taught them in a different order. I like that there are a couple pages of review at the end of each chapter. The review is not simply a word for word review, but rather each main concept explained a little differently (and summarized in about 3 or 4 sentences). I find the graphics extremely easy to understand as well. Most of diagrams are not overly crowded with 8 million arrows. I also have the lab manual that goes with this text. While the lab manual is not used exclusively in my class, it is nice to have supplementary material (even though many of the photos

in the book and lab manual are the exact same). Lastly, I am using the 11th edition while the rest of the class is using the 12th. There is no difference except that the page numbers are slightly off. 99% of the images and the wording are the exact same. The powerpoints used in lecture are all based on the 12th edition text. I have absolutely no problem taking my 11th edition text, looking at the 12th edition powerpoint, and following along. Everything still lines up perfectly. By purchasing a used copy of the old edition, I saved about \$300. And frankly, I like the font in the 11th edition better as well.
