It's Right Under Your Nose

Synopsis

I am Dr. Hal Huggins. Noteworthy as being one of the most controversial dentists of the century. Which century? Probably two of them. Why controversial? Because I observe - and report what I find. I use blood chemistry evaluations to determine what dental materials are naughty and which are nice. This upsets a great financial institution that has had a low key white knight reputation for over 100 years. What are the consequences of my observations? Exposure of massive liability. Resulting in lie-ability. Greater liability than Enron. Greater than the tobacco fiasco. Who does it effect? Most everyone. Probably you. I am presenting the observations of the last 37 of my 43 years of practice. These comments are connections I have seen between dental materials and incurable diseases. Which diseases? Breast cancer, diabetes, Multiple sclerosis, Lupus, Lou Gehrig's disease (ALS), Arthritis, Alzheimer's, Leukemia, even Gulf War Syndrome - and a bunch more. None of which have a definitive cause like measles, mumps or chicken pox. Symptoms? Yes a bunch of those too. The most prevalent are chronic fatigue, depression, anxiety, recurring headaches, high blood pressure, digestive upsets, unidentified chest pains and memory problems. Which dental materials are implicated? Mercury, nickel, beryllium, copper, and toxins formed in dead or root canal teeth as well as in cavitations. --- from book's back cover

Book Information

Paperback: 85 pages

Publisher: Dragon Slayer Publications (2005)

ISBN-10: 0972461132

ISBN-13: 978-0972461139

Product Dimensions: 8.8 x 5.9 x 0.3 inches

Shipping Weight: 4.8 ounces

Average Customer Review: 5.0 out of 5 starsÂ Â See all reviewsÂ (1 customer review)
